

In the management of
GERD, Acid dyspepsia
Ulcer & Gastric Reflux

CINTORAC

CINTORAC

Pantoprazole Sodium 40 mg +
Cinitapride Hydrogen Tartrate 3 mg

Capsules

The Potent PPI for Extended Care

Pantoprazole

Irreversible proton pump inhibitor (PPI) that reduces gastric acid secretion
Induces profound inhibition of basal, nocturnal & 24 hr gastric acidity

Cinitapride

is a prokinetic which facilitates the movement of intestines, thereby increasing the frequency of bowel movements, softening stools, and reducing abdominal pain/discomfort.

**Advantage of Sustained Release Formulation
for Round the Clock & Maintained Action**

In

- Acid Reflux Disease
- GERD
- Heart Burn & Dyspepsia
- NSAID Associated Ulcers

Prolonged Action for Sustained Relief
