

Keep **Action** on without any
pain & inflammation

ACIPAC TP

ACIPAC TP

Aceclofenac 100 mg + Paracetamol 325 mg + Thiocolchicoside 4 mg **TABLETS**

Aceclofenac

- ✦ Blocks the action of cyclo-oxygenase
- ✦ Relieves pain & Inflammation in arthritis

Paracetamol

- ✦ Potent analgesic & antipyretic agent

Thiocolchicoside (TCC):-

- Thiocolchicoside (TCC) is a semisynthetic Sulfur derivative of colchicoside, occurring From plant *Gloriosa superba*.
- Thiocolchicoside in **Mevier-TP** has an Agonist Interaction with Spinal -Strychnine - Sensitive Glycine Receptors that could mediate its Myorelaxant effects.
- TCC acts as a GABA receptor agonist that induces depression of the CNS and in turn Myorelaxation.
- TCC acts via the GABA mediated MOA both to relax Muscle Spasm and to relieve pain.

Mevier-TP indicated in:-

- As an adjuvant treatment in painful spasm associated with Degenerative Vertebral Disorder.
- Dorsal pain.
- Low back pain.
- Traumatological and Neurological Disorder.
- Musculoskeletal painful and Inflammatory conditions in Adults.
